

EXHIBIT C

LexisNexis® SmartLinx® User Guide

Quickly comb through billions of records simultaneously making it easy to connect names, addresses, phone numbers and other information with appropriate people, businesses and locations.

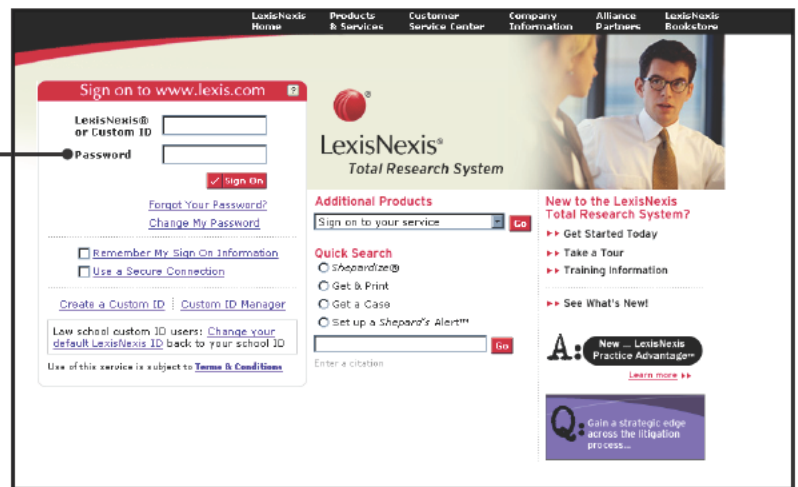

- Access data more quickly with a new streamlined platform
- Create reports on the fly to make more accurate connections

- Pinpoint relevant data faster with a tabular format that makes reports easier to read
- Increase the accuracy of results with feature/functionality designed for precision, e.g., specified radius

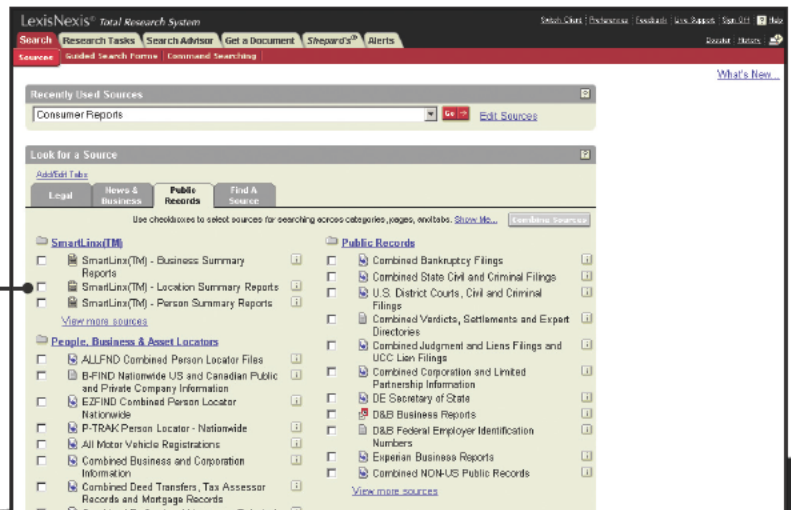

This user guide will walk you through the SmartLinx® interface and provide you some illustration of the many ways you can use this powerful tool.

Accessing LexisNexis SmartLinx

Sign on to the LexisNexis® services by entering your LexisNexis ID and secure password.

From the Search tab, click on the Public Records tab. You will see a link at the top left for SmartLinx. Choose the type of SmartLinx report you want to retrieve: Person, Business or Location summary.

SmartLinx Basics

Regardless of the type of report you are looking for, there are some basics to searching in SmartLinx:

1. Select one of the three search forms to begin your search: Person Report, Business Report or Location Report.
2. LexisNexis takes the protection of personal data very seriously and requires that all SmartLinx users have a valid purpose in searching for information on individuals. Permissible-use selections are integrated into the search form itself, so you don't have to work through multiple screens. You must indicate acceptable uses under the provisions of both the Gramm-Leach-Bliley Act (GLBA) and the Driver's Privacy Protection Act (DPPA).
3. Use sounds-like search capability as an alternative to exact-match searching when you are unsure of the correct spelling of a name or you want to cover all alternatives.
4. Easily search an entire metro area—addresses within a 30-mile proximity area are returned automatically in the answer set unless you select a proximity from the drop-down list—from No Radius up to 100 miles.
5. Zero in on a subject by including known information about his or her birthday. Use year of birth to clarify whether results belong to a Sr. or Jr.
6. Eliminate guesswork. Phonetic search capability frees you from the need for exact spellings of persons, cities, streets. Nicknames are searched automatically, e.g., Tom, Thom, Tommy, etc.

Use of this product is governed by applicable law, including the Drivers' Privacy Protection Act and related state laws (DPPA) and the Gramm-Leach-Bliley Act (GLBA), and your user agreement with LexisNexis. The data regulated by the DPPA and the GLBA may be used only for the permissible uses listed in the drop down boxes above and detailed below. By selecting a permissible use, you are certifying that the data returned to you will be used only for that use. If you do not have a permissible use, you will not be given access to that data. As required by law and its agreements with its data suppliers, LexisNexis will record your User ID number and your selected permissible use for each search of the data regulated by the DPPA and the GLBA. The data provided to you by use of this product may not be used as a factor in establishing a consumer's eligibility for credit, insurance, employment or other purposes identified under the Fair Credit Reporting Act (FCRA)(15 U.S.C. sec 1681).

Important: The Public Records and commercially available data sources used in SmartLinx™ Reports have errors. Data is sometimes entered poorly, processed incorrectly and is generally not free from defect. This system should not be relied upon as definitively accurate. Before relying on any data this system supplies, it should be independently verified. For Secretary of State documents, the information contained in the SmartLinx™ Reports is for information purposes only and is not an official record. Certified copies may be obtained from that individual state's Department of State.

*You may enter a Social Security number in a search, but only a partial number, minus the last four digits, will actually display in the results.

Person Summary Reports

When you run a search in SmartLinX, a report is generated for each of the different types of information searched, e.g., addresses, voter registrations, licenses, real property, etc. You can either scroll through the entire document to read a summary of each report, or link directly to each summary.

The following screens walk you through a sample of search results beginning with the results listing and running through the individual reports. The sample is taken from a search for George Washington, who lives in Ohio, using Washington as the last name, George as the first name and Ohio as the state.
